

INVESTIGATOR'S ANNUAL REPORT

National Park Service

All or some of the information provided may be available to the public

Reporting Year: 1998	Park: Glacier Bay NP & PRES
Principal Investigator: Philip Hooge	Office Phone: 907-697-2367
	Email: Philip_hooge@usgs.gov
Address: Glacier Bay Field Station Post Office Box 140 Gustavus AK 99826 AK	Office Fax: 907-697-2654
Additional investigator or key field assistants(first name, last name, office phone, office email)	
Name: Spencer J. Taggart Phone: 907-364-1577 Email:	
Permit #: GLBA1998Hooge2	
Park-assigned Study Id. #: unknown	
Study Title: Fjord oceanographic survey and monitoring of Glacier Bay, Alaska.	
Permit Start Date: Jan 01, 1998	Permit End Date: Jan 01, 1999
Study Start Date: Jan 01, 1998	Study End Date: Jan 01, 1999
Study Status: Completed	
Activity Type: Monitoring	
Objectives: <p>This project involves the monitoring of within and between year oceanographic patterns along the glacial chronosequence in Glacier Bay, Alaska. Glacier Bay exhibits large scale differences in oceanographic patterns due to fjord and estuarine processes as well as the recent history of glaciation, and large numbers of tide water glaciers. A lack of understanding of the natural variation in this system make the elucidation of anthropogenic changes problematic and fraught with controversy.</p>	
Findings and Status: <p>This was the fifth year of a continuing study to monitor oceanographic patterns in Glacier Bay. Efforts include six oceanographic surveys done annually which sample 21 stations spread throughout the lower west and east arms of Glacier Bay. A profile with salinity, temperature, primary productivity (chlorophyll a concentration), light penetration and turbidity is taken at one meter intervals at each site. Data is processed and made available to the park and all researchers through internet access immediately after surveys. A major effort will be undertaken in 1999 and 2000 with the hiring of an oceanographic postdoc to analyze the data from all years. Currently limited analysis has been conducted which has been used in several publications and talks addressing the effects of oceanographic patterns on species distributions. Current findings include: elucidation of patterns of water stratification which indicate that upwelling occurs continuously in several parts of the bay and on a twice daily basis in many other areas, the distributions of halibut are controlled by either salinity or the closely linked sedimentation patterns, and the primary productivity system at Glacier Bay is probably light limited rather than nutrient limited.</p>	
For this study, where one or more specimens collected and removed from the park but not destroyed during analyses? No	
Funding provided this reporting year by NPS: 0	Funding provided this reporting year by other sources: 15000

<p>Paperwork Reduction Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. Public reporting for this collection of information form is estimated to average 1.38 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the forms. Direct comments regarding this burden estimate or any aspect of this form to Dr. John G. Dennis, Natural Resources (3130 MIB), National Park Service, 1849 C Street, N.W., Washington, DC 20240.</p> <p>Privacy Act Notice: Scientific research, education and collecting activities within units of the National Park System that may impact parks invoke a permitting and reporting requirement per regulations at 36 CFR 1.6 (Permits), 36 CFR 2.1 (Preservation of Natural, Cultural and Archeological Resources), and 36 CFR 2.5 (Research Specimens). The National Park Service collects information about permit applicants and permittees to administer and document research, collecting, and reporting activities within parks. The information disclosed on this form is required and may result in denial of permit applications if not provided.</p>
